

Teat Care

TeatX®

Advanced Chlorhexidine Teat Sanitiser

3 key benefits

- 1 Fast penetration speed
- 2 Delivers superior teat condition to help prevent mastitis
- 3 Multiple dilution rates 1:4, 1:7, 1:9

Available sizes: 20L, 100L, 200L, 1,000L

Other TeatX® features

- Neutral pH to reduce irritation on cows skin
- Stable in most water types
- Highly stable against chemical contamination
- Produces a fine mist spray for better teat surface coverage

Product composition

Components	Concentration [%]
Glycerine Emollient	<40.0
Nonionic Surfactants	<10.0
Ethanol	<5.0
Chlorhexidine Digluconate	<5.0
Dye	<0.1
Water	To 100%
Total Active (Chlorhexidine)	3.0%
Total Emollient (Glycerine)	35%

Teat Care

TeatX[®]

Superior teat spray formulation

● The importance of wettability

The ability for the teat spray to penetrate soil and the oily layer on the udder and teat.

● Most stable teat spray

Water quality is a big issue in NZ sheds.

TeatX[®] is the most stable teat spray, staying clear at high levels of chemical and water contamination when compared to all other chlorhexidine teat sprays.

	Distilled Water	Hamilton Town Supply	Hard Water	Alkaline Water
TeatX[®]	Clear	Clear	Clear	Clear
Other Chlorhexidine Sprays	Clear	Cloudy	Cloudy	Cloudy

TeatX[®] is New Zealand's leading chlorhexidine teat spray delivering superior teat condition to help prevent mastitis. It is the only teat spray on the market which has all the following components:

- Longer killing power during calving period
- More emollient for better teat condition
- Most stable against hard water & chemical contamination
- pH neutral to be kinder on teats
- < 2 second penetration
- NPE free

Mixing chart

1:4 mixing

1 part **TeatX[®] Plus** to 4 parts water = total of 5 parts

5L Vessel	=	1L TeatX[®] Plus	+	4L Water
20L Vessel	=	4L TeatX[®] Plus	+	16L Water
50L Vessel	=	10L TeatX[®] Plus	+	40L Water
80L Vessel	=	16L TeatX[®] Plus	+	64L Water
100L Vessel	=	20L TeatX[®] Plus	+	80L Water
